

From the President's Desk

Dear Parents,

The previous academic year was a real joy and thrilling as we started in a new building. The teachers and the children enjoyed the classes and the activities in the new building. The children enjoyed playing in the fourth floor and we had several fun filled activities over there...

Time indeed flies so fast and we ended March with a graduation ceremony. The children had dreams and more and I wish all our graduates the very best in life. I am certainly looking forward to the New Year with several new challenges, excitement as well, with more children, teachers and the latest resources!

Our first graders had a fun filled year, learnt a lot and enjoyed the entire schooling year. This year, we will have first and second graders as well. They will enjoy camping, nature learning and even some hands-on experiments to complete the learning environment.

The Kindergartners are growing up so fast and it is fun to be around the innocent young ones.

So we commence another year of activities, field trips, camping, barbecuing, parties etc., and of course a world of fun and learning!

We are making plans towards our own building, more space and more things...

So we start our latest academic year with new students, lots of new books, games and toys. I shall stop here and welcome all the new students to Little Angels.

Together lets all have fun in learning this year as well.

Nothing is Impossible!

Warm regards,

Rani
